

t = 0 s
read instruction, inspect the
terminal emulation code

t ≈ 58–66 s
run the test suite
7 of 7 tests pass — reward 1.0
the benchmark requirement is met

contrast

baseline on the same task:
144 s and 114 s, \$0.27 and \$0.20
zero recognised test runs
never verified, and was right anyway

read CLAUDE.md: post-implementation
review and TDD cycles are recommended

invoke noc-tdd → code-review
→ noc-fix → security-review

no exit condition on
'verification already passes'

9 sub-agents · 64 steps
docstrings, defensive assertions,
stylistic tweaks applied

t = 900 s · AgentTimeoutError
Harbor kills the container
recorded as censored
\$2.21 and \$2.79 · 8.1x and 14.1x baseline
